y : H, OH

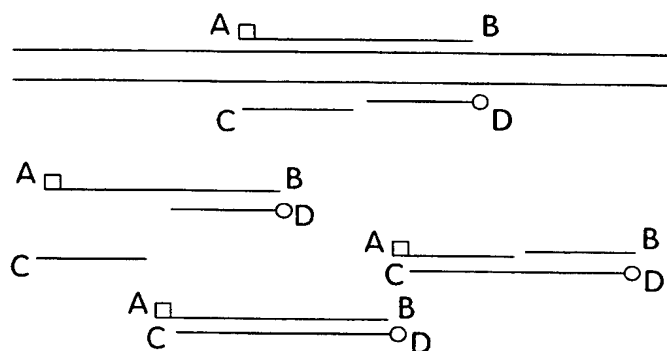

n : 0 - 20

Fig. 12

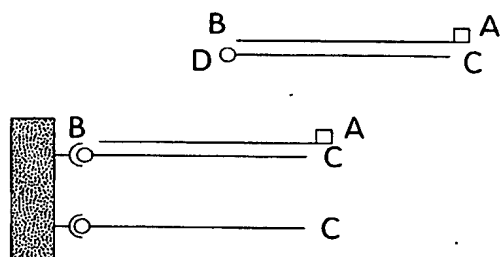

9/10

## 1. LCR with two differently derivatized primers

## 2. Coupling to solid phase via NHS-DMT linker

## 3. Coupling of the reporter enzyme and detection

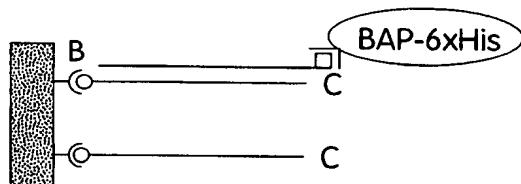

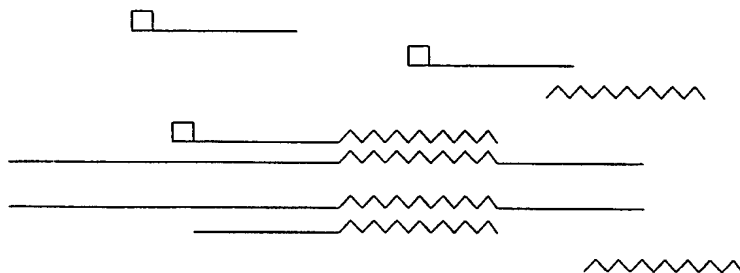

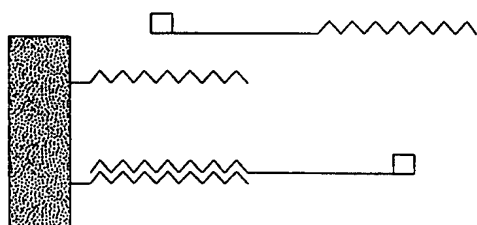

Fig. 13

10/10

## 1. PCR in a crude cell lysate

## 2. Denaturing and filtration through a membrane with bound capture oligonucleotides

## 3. Coupling of the reporter enzyme and detection
